

The Click Trainer

Challenge

Individuals with visual impairments cannot view the information that is displayed on the console of the treadmill when exercising.

Design

The Click Trainer is an auditory feedback device that outputs desired information, such as distance, speed, and time, directly from the treadmill to the user via headphones.

Click Button

- Large, easy-to-press button
- Loud click sound
- Minimal confusion

Data outputted via audio

Plugs Directly Into Treadmill

- Data drawn from CSAFE port
- 100% accurate
- Device does not interfere with user
